IDENTITY / P6 CONFIRMED

Quiet confidence. Precise by design.

AI. SOFTWARE. DIGITAL.

Master artwork, usage rules and practical brand assets.

01 / THE IDENTITY

One name. A focused technology identity.

Brand name: Xelorsoft. Pronunciation: Zel-or-soft.

The logo wordmark is xelorsoft. with a small circular full stop.

The XS monogram carries the recognition; the wordmark provides clarity.

Positioning: custom software, applied AI and digital experiences.

Services also include websites, digital marketing and creative media.

02 / LOGO SYSTEM

Use the right master for the background.

PRIMARY NIGHT

PRIMARY LIGHT

Icon: use for avatars, app tiles and favicons.

Transparent masters are supplied in white and black.

All wordmark lettering is outlined. Use the supplied artwork;

do not recreate it by typing the brand name.

03 / PRECISION & SPACING

Protect the silhouette and the signature dot.

Exact badge: 368 x 368 construction units.

Corner radius: 64 units on all four corners.

Signature dot: a true circle, radius 10 units.

Dot gap after t: 12 units; bottom aligned to baseline.

Clear space: at least 64 units around the lockup.

Minimum digital width: 180 px for the full logo.

Minimum icon export: 32 px. Prefer 48 px and above.

DO: scale proportionally, use high contrast, keep the dot attached to the wordmark.

AVOID: stretching, extra outlines, effects, moving the dot, filling the XS knockout.

The badge is square. Sharpened diagonal terminals and clean curves define the mark.

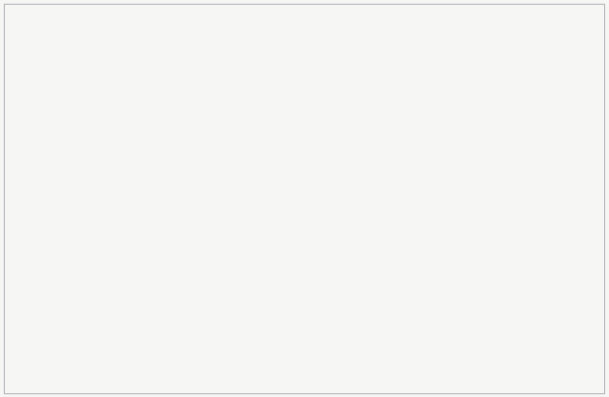
04 / COLOR

A disciplined monochrome palette.

CARBON

#171719

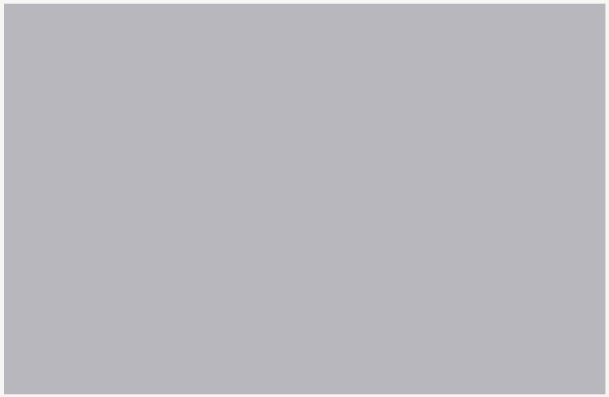
Primary backgrounds / primary text



PORCELAIN

#F6F6F4

Logo foreground / light surfaces



SILVER

#B7B7BD

Dividers / secondary details on dark

Keep artwork flat. Use Carbon and Porcelain as the main pair.

Silver supports hierarchy; avoid using it for small text on light backgrounds.

Print: convert through the printer profile and approve a physical proof.

HEX values are the digital source of truth. No metallic finish is required.

05 / TYPOGRAPHY & VOICE

Clear language. Deliberate typography.

Manrope

Aa Bb Cc 0123456789

IBM PLEX MONO / LABELS

Headings: Manrope Semibold.

Body: Manrope Regular.

Labels: IBM Plex Mono Regular.

Fonts and OFL licenses are included.

The logo is custom outline artwork,

not a font setting.

Write directly: what we build, who it helps, and what the next step is.

Example: We build custom software and AI tools around your business.

Keep claims specific. Use real project evidence instead of superlatives.

Suggested descriptor: AI. Software. Digital. Keep it separate from the logo.

06 / APPLICATIONS

Build recognition through consistency.

xelorsoft.

Software that fits your business.

AI / SOFTWARE / DIGITAL

AVATAR / SYMBOL

Social templates: 1080 x 1350 post,

1080 x 1920 story, 1080 square,

and a 1584 x 396 LinkedIn banner.

Avatar: use the symbol, without the wordmark.

Use one strong message and generous margins.

A4 letterhead and 90 x 50 mm business

card templates are included.

Replace contact placeholders before use.

07 / DELIVERY

A practical kit for everyday use.

01_Logos	SVG masters, 4096 px PNGs, transparent logos, icon sizes and vector PDF.
02_Colors	Palette JSON and CSS tokens.
03_Typography	Manrope and IBM Plex Mono font files with OFL licenses.
04_Social	Outlined editable SVG artwork and ready-to-use PNG exports.
05_Stationery	A4 letterhead, business card templates and an HTML signature template.
06_Brand_Guide	This guide.
07_Source	Master geometry, component paths and reproducible build scripts.

Preferred master: Xelorsoft-Primary-Night.svg. Use SVG for scalable digital artwork.

For print use the vector PDF. PNGs are convenience exports, not the master.

Exploration folders are reference history; the confirmed P6 master supersedes them.
